

2024

PRODUCT GUIDE

Protecting natural resources.

Preventing pollution.

Reducing waste.

“We strive towards continual improvement in our environmental performance and endeavour to minimise the scale of our adverse impact on the environment by setting, implementing, monitoring and reviewing environmentally conscious operational objectives and targets.”

Recognising the long term benefits to our business and our customers, we are committed to taking an active part in protecting natural resources, preventing pollution and reducing waste.

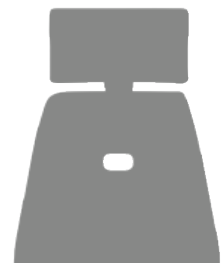

QR Code Scanning

We have added QR Codes which allow users to access unbranded operating and assembly instructions. This has resulted in a reduction of printed sheets of paper, totalling approximately 50,000 less printed sheets per year!

Continual Improvement

We continually strive for environmental excellence, changing and creating processes to help us lower our carbon footprint. We are delighted to say that our BSI ISO:14001 accreditation has been successfully renewed.

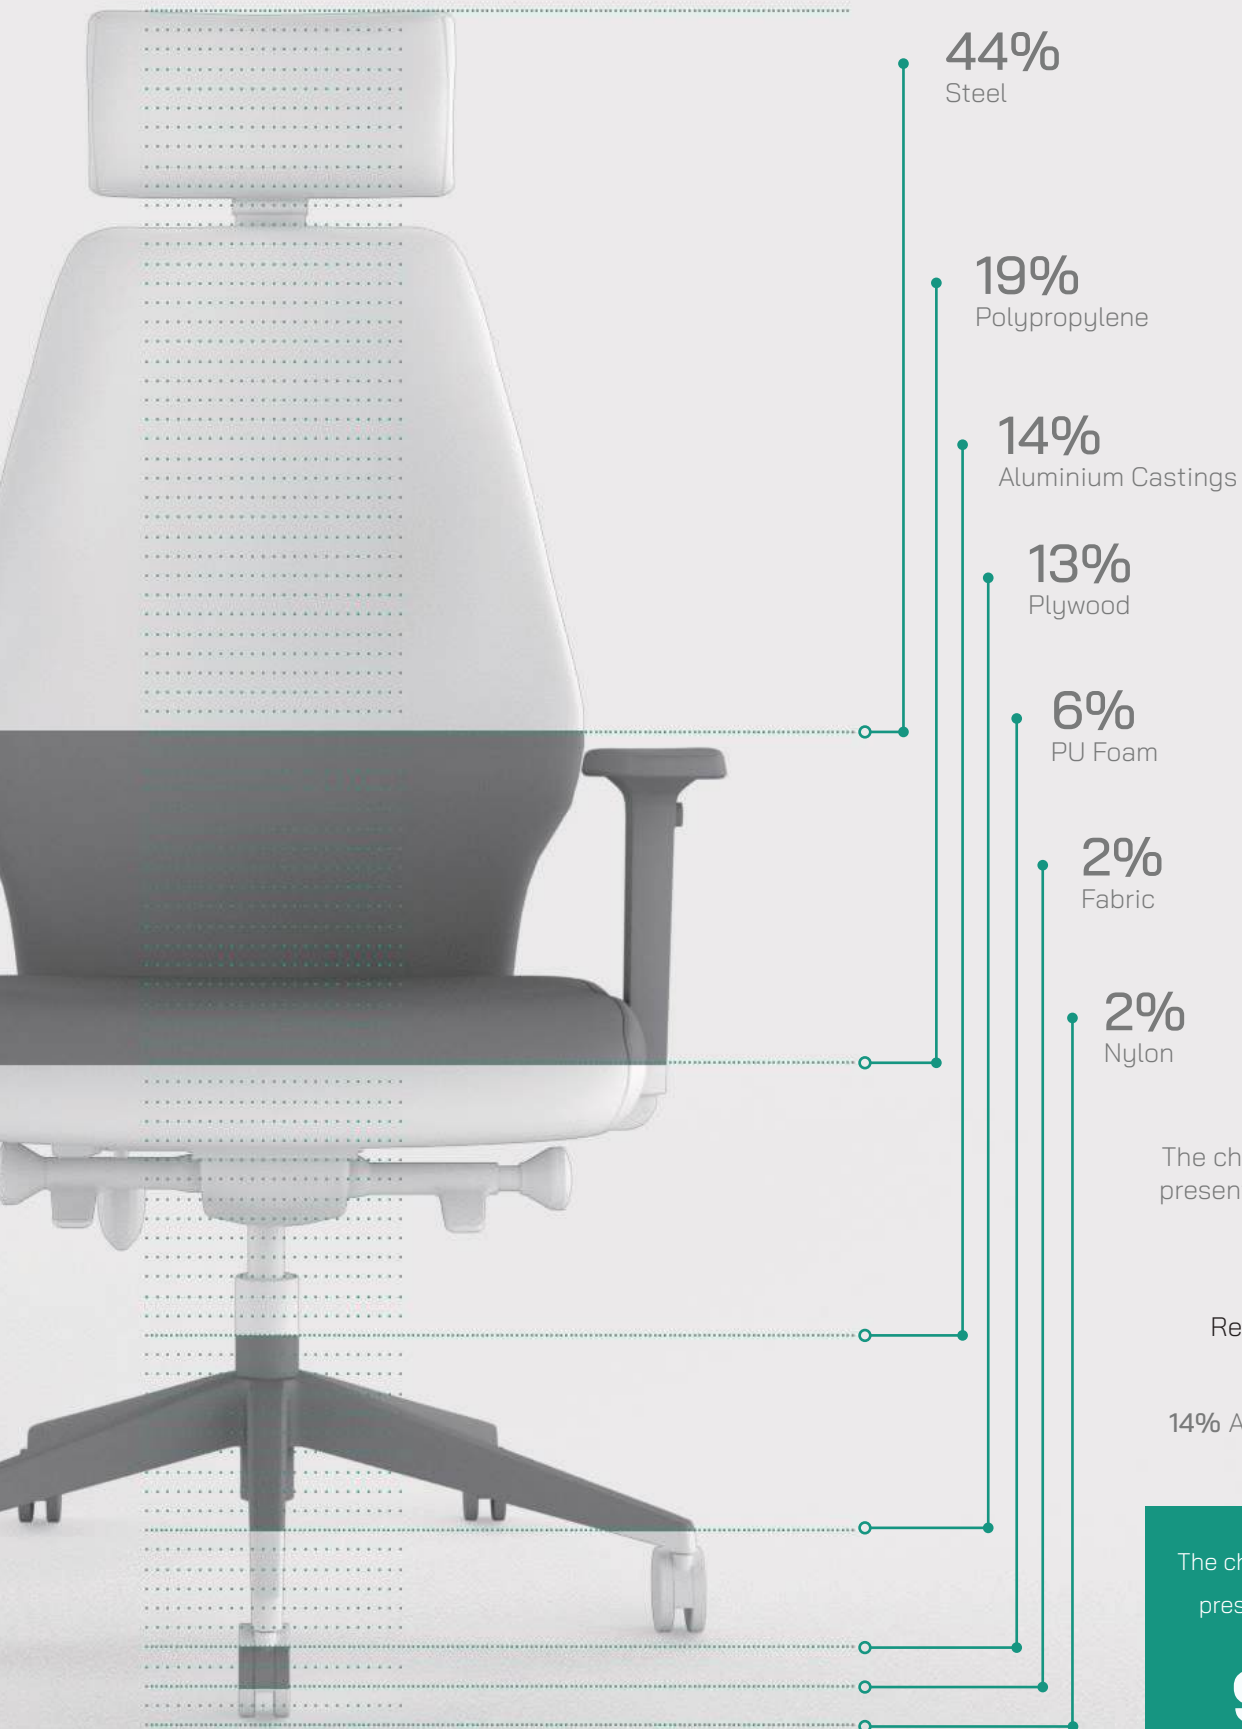

Glue-less Technology

We have developed and enhanced our manufacturing techniques, enabling us to build our upholstered swivel chair backs with an E-badge, resulting in the product becoming totally glue-less.

Component Breakdown

We only use the highest quality components when building our products. The chairs featured in this presentation are constructed from:

The chairs featured in this presentation contain up to

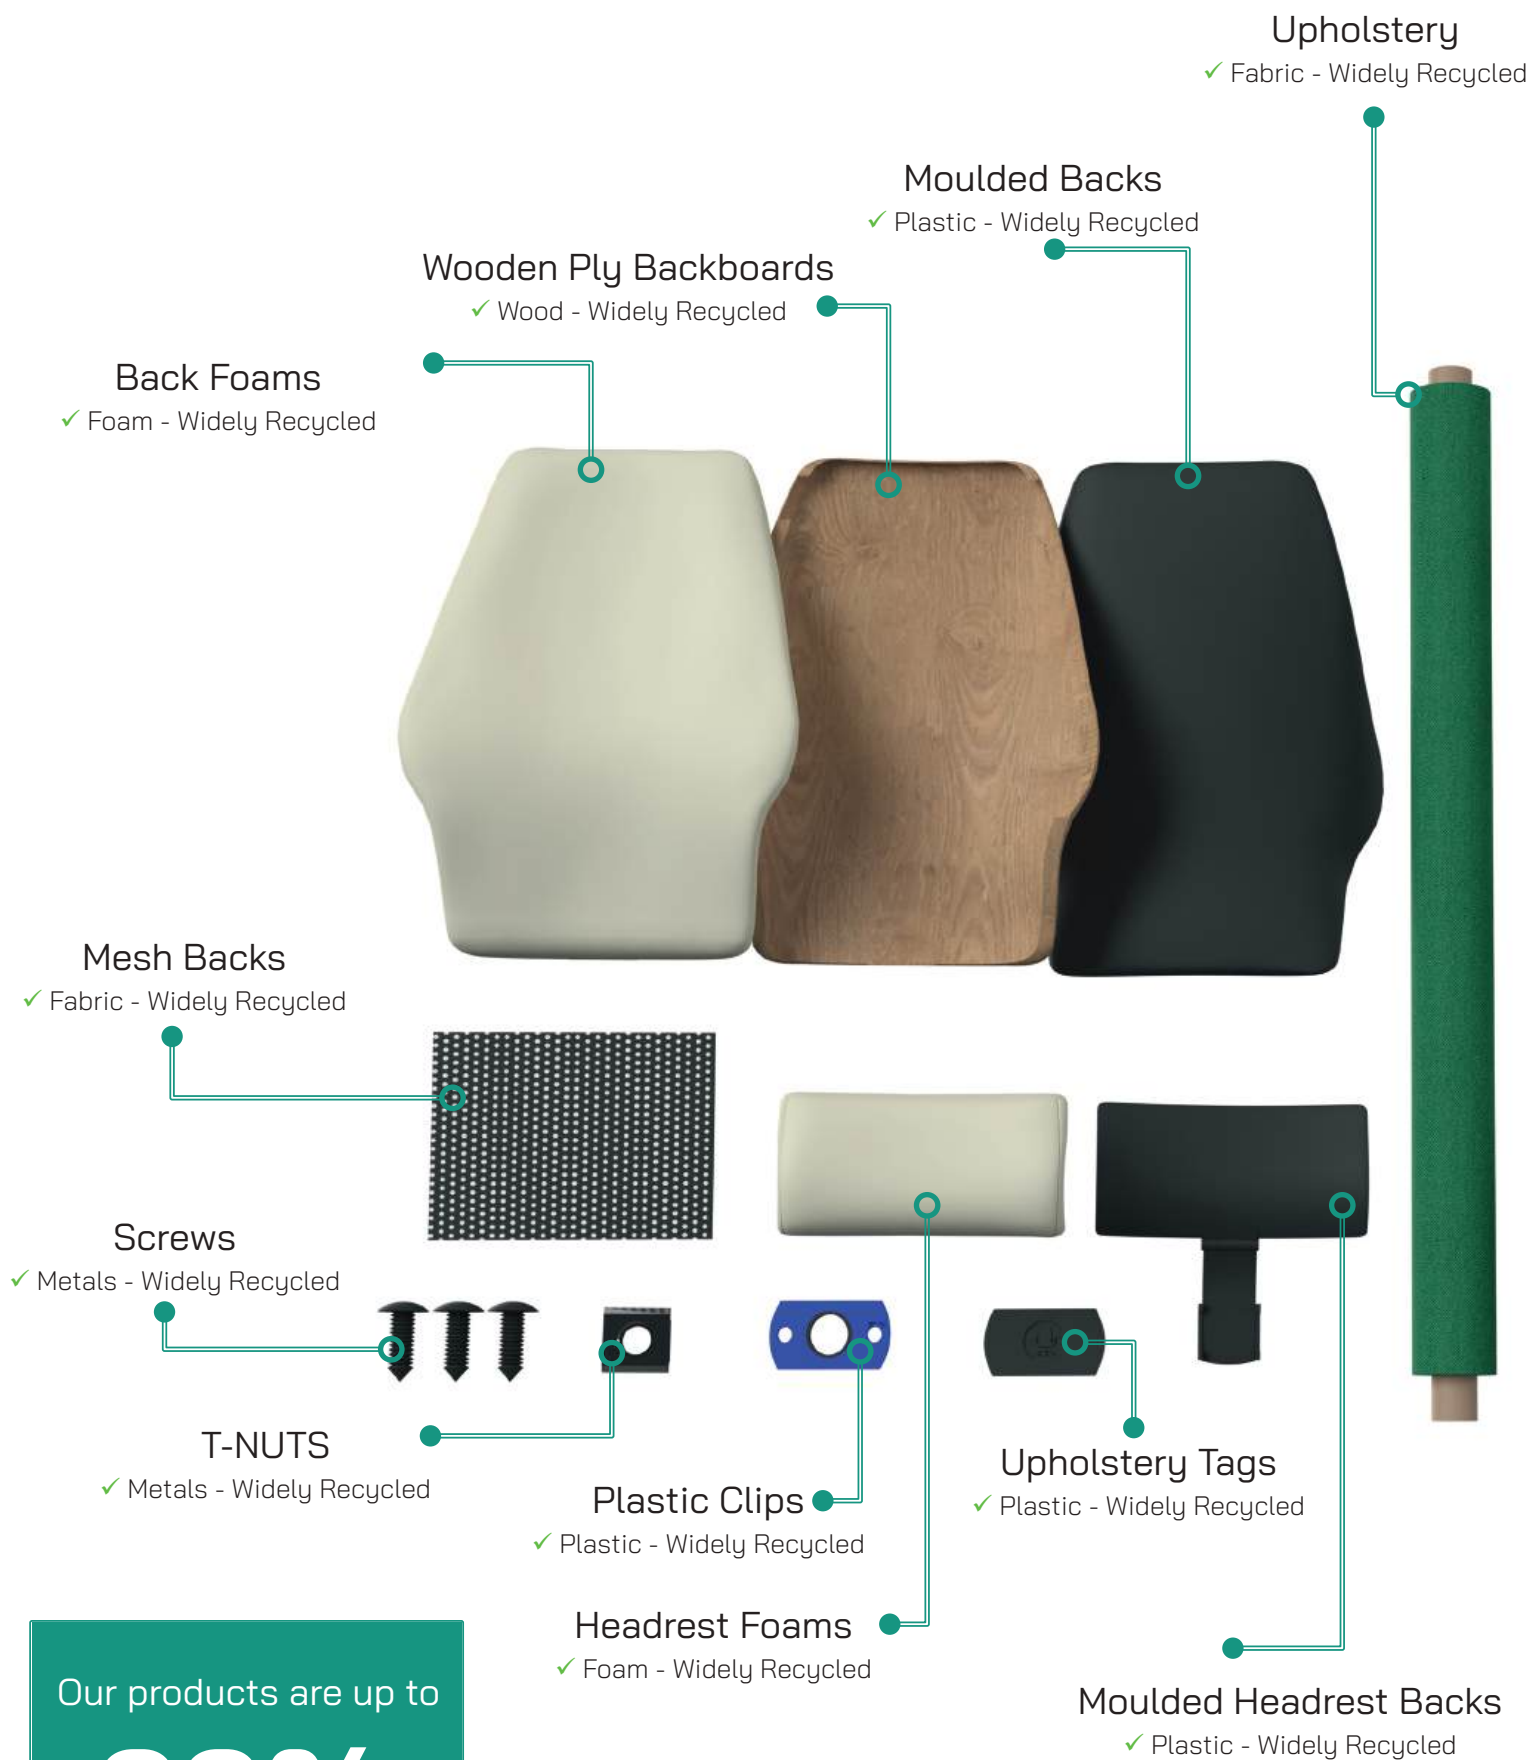

37%
Recycled Material

21% Steel
14% Aluminium Castings
2% Fabric

The chairs featured in this presentation are up to

99%
Recyclable

Component Recyclability

Our products are up to

99%

Recyclable

Did you know...

The fabric on your chair could be recycled to make mattress filling, lining insulation, toy stuffing or even another eco-friendly fabric that is made from recyclable material.

The plastic on your chair could be shredded, melted, extruded then moulded into new chair parts.

The foam on your chair could be chipped or crumbled and recycled for use in other hard-wearing applications such as underlay or sofa arms.

The metals on your chair can be recycled to make all sorts of steel products like bike frames, cars and paper clips.

We only use the highest quality components when building our products, all of which contain up to 37% recycled material.

We continually strive for environmental excellence, changing and creating processes to help us lower our carbon footprint, successfully renewing our BSI ISO:14001 accreditation for another year.

PREVENTATIVE & CORRECTIVE SOLUTIONS.

Ergonomic seating is vital for well-being in the workplace. Well-being improves motivation, productivity and energy levels. Employers should consider actiV seating for their workforce.

All the above information points towards the necessity for seating that offers adequate, variable and flexible support which can be adjusted sufficiently to suit the majority of the workforce.

The challenge to overcome the diversity of different body shapes and sizes resulted in the development of actiV - a highly engineered yet affordable ergonomic and posture solution.

and **DSE Assessors.**

Intro

Ergonomically Designed, Anatomically Correct.

Intro consists of 9 tried and tested economical models to offer a solution for petite, regular and larger users.

Centred around the same easily adjusted heavy duty mechanism available with a 3-lever independent or full synchronised movement, both offering height adjustable backrests and bodyweight tension control support.

With infinitely lockable positions, you can find the position that is most comfortable for you throughout the day which can then be easily adjusted when required.

Including a seat depth adjustment and inflatable lumbar support as standard, all Intro models can be customised with armrest choices and optional extras to tailor to each individual user.

360° Swivel

Seat Height

Back Height

Back Angle

Seat Angle

Seat Depth

Lumbar Support

Arm Adjustment

1. Headrest

Optional Extra: /HR

Available on selected models, the addition of a height and angle adjustable headrest supports the user in reclined positions, relieving stress within the neck muscles.

3. Coccyx Zone

Optional Extra: /CC

A cut out / soft pocket located at the back of the cushion which provides a discrete solution to coccyx pain and provides pressure relief to the tail bone area caused by trauma or scarring.

5. Seat Slide

Standard Feature

Allows the user to increase the seat depth in order to optimise comfort and support and reduce the amount of pressure transferred to the legs.

7. Air-Flo Seat Cell

Optional Extra: /AIR

A dual chamber air cell below the seat surface offers a "reactive sit" whilst providing cushioning to the sit bones, helping to improve core strength and reduce sciatic pain.

9. Adjustable Arms

Optional Extra

- A: Height Adjustable Arms (AA1D)
- B: Height and Depth Adjustable Arms (AA2D)
- C: Height and Foldaway Adjustable Arms (AF)
- D: Multi-Functional Arms (AMF)

2. Inflatable Thoracic Support

Optional Extra: /ITC

Increases the contact area of the upper spine by filling the space between the shoulder blades, helping to prevent slouching and reduce pain/discomfort in the shoulder and neck area.

4. Performance Seat Foam

Optional Extra: /PF

Pressure sensitive to mould to the user's seated position, enhancing comfort and support throughout the working day. Also known as memory foam.

6. Inflatable Lumbar Support

Standard Feature

Increases the contact area of the lower back, giving additional support to the lumbar area and supporting the natural curvature of the spine whilst preventing fatigue and lower back pain.

8. Polished Base

Optional Extra: /AB

As well as increasing the aesthetic appeal of the range, a polished base is also recommended for seating users who are in excess of 115kg.

Solo

The definitive ergonomic project chairs.

Solo gives a unique and modern take on ergonomics with the adjustability of a specialist posture chair combined with the soft aesthetic of an everyday task chair, making it an ideal solution for corrective single users, or preventative larger scale projects.

Taking inspiration from the movement of the body.

The advanced mechanism encourages dynamic movement with a synchronised seat and backrest tilt that can be left in a constant free-floating motion or locked in a fixed position, a 5 degree forward seat tilt to promote positive blood flow, and also a 5 degree backrest angle adjustment. It has never been easier to achieve the ultimate seated position.

As a result of the magnitude of standard features and optional extras, Solo can be shared and used by a variety of individuals. In cases where the original user's needs change or if they leave then the chair can be easily set back up to suit different occupational health requirements.

Lumbar Support

Arm Adjustment

1. Headrest

Selected models

Standard on certain models, the addition of a height and angle adjustable headrest supports the user in reclined positions, relieving stress within the neck muscles.

3. Coccyx Zone

Optional Extra: /CC

A cut out / soft pocket located at the back of the cushion which provides a discrete solution to coccyx pain and provides pressure relief to the tail bone area caused by trauma or scarring.

5. Seat Slide

Standard Feature

Allows the user to increase the seat depth in order to optimise comfort and support and reduce the amount of pressure transferred to the legs.

7. Air-Flo Seat Cell

Optional Extra: /AIR

A dual chamber air cell below the seat surface offers a "reactive sit" whilst providing cushioning to the sit bones, helping to improve core strength and reduce sciatic pain.

9. Polished Base

Optional Extra: /AB

As well as increasing the aesthetic appeal of the range, a polished base is also recommended for seating users who are in excess of 115kg.

2. Inflatable Thoracic Support

Optional Extra: /ITC

Increases the contact area of the upper spine by filling the space between the shoulder blades, helping to prevent slouching and reduce pain/discomfort in the shoulder and neck area.

4. Performance Seat Foam

Optional Extra: /PF

Pressure sensitive to mould to the user's seated position, enhancing comfort and support throughout the working day. Also known as memory foam.

6. Inflatable Lumbar Support

Standard Feature

Increases the contact area of the lower back, giving additional support to the lumbar area and supporting the natural curvature of the spine whilst preventing fatigue and lower back pain.

8. Flex-Front Seat

Selected Models

Proven medical scanning has been used to show that using the forward tilt motion can lead to increased muscle activity in the stomach, hip and back areas. This enables segments of the lower spine to be set in motion, dynamically promoting good posture and healthy circulation.

10. Adjustable Arms

Standard Feature

Choose between models with Height and Depth Adjustable Arms or Multi-Functional Arms. Non-armed versions are also available.

YOU ergo

The office chair range that was designed for you.

One range of seating, two levels, working in parallel, working for YOU.

YOU was designed with comfort, support and durability in mind. Defined by mechanism, each range is available in both upholstered and mesh back options. At both levels the backrests are a key feature, with height, angle and lumbar adjustability, integral for optimum support.

Coupled with a flex-front seat to enhance the reclining movement YOU will improve ergonomic comfort. A stylish, contemporary solution for the workplace employee, remote worker or those seeking a corrective posture solution.

360° Swivel

Seat Height

Back Height

Back Angle

Seat Angle

Seat Depth

Lumbar Support

Arm Adjustment

1. Headrest

Optional Extra: /HR

Available on selected models, the addition of a height and angle adjustable headrest supports the user in reclined positions, relieving stress within the neck muscles.

3. Coccyx Zone

Optional Extra: /CC

A cut out / soft pocket located at the back of the cushion which provides a discrete solution to coccyx pain and provides pressure relief to the tail bone area caused by trauma or scarring.

5. Seat Slide

Standard Feature

Allows the user to increase the seat depth in order to optimise comfort and support and reduce the amount of pressure transferred to the legs.

7. Air-Flo Seat Cell

Optional Extra: /AIR

A dual chamber air cell below the seat surface offers a "reactive sit" whilst providing cushioning to the sit bones, helping to improve core strength and reduce sciatic pain.

9. Polished Base

Optional Extra: /AB

As well as increasing the aesthetic appeal of the range, a polished base is also recommended for seating users who are in excess of 115kg.

2. Inflatable Thoracic Support

Optional Extra: /ITC

Increases the contact area of the upper spine by filling the space between the shoulder blades, helping to prevent slouching and reduce pain/discomfort in the shoulder and neck area.

4. Performance Seat Foam

Optional Extra: /PF

Pressure sensitive to mould to the user's seated position, enhancing comfort and support throughout the working day. Also known as memory foam.

6. Inflatable Lumbar Support

Standard Feature

Increases the contact area of the lower back, giving additional support to the lumbar area and supporting the natural curvature of the spine whilst preventing fatigue and lower back pain.

8. Flex-Front Seat

Standard Feature

Proven medical scanning has been used to show that using the forward tilt motion can lead to increased muscle activity in the stomach, hip and back areas. This enables segments of the lower spine to be set in motion, dynamically promoting good posture and healthy circulation.

10. Adjustable Arms

Optional Extra

Choose between models with Height and Depth Adjustable Arms or Multi-Functional Arms. Non-armed versions are also available.

Removing the **complexity**
and **confusion** of **adjustment**.

Echo

Designed with
sustainability in mind.

The office is evolving into a more sustainable environment.

As individuals, we are now more aware of the impact we have on our planet. We want to be green, but don't want to compromise on the quality of products we consume.

Echo has been designed to fulfil these needs.

60% Recycled content

Using less than 40% virgin material, Echo is comprised of an impressive 60.4% recycled material. Positively impacting the environment, without negatively impacting quality.

100% Recyclable

All of Echo's components can be broken down and recycled responsibly. Echo's life-cycle is further enhanced by a 10 year guarantee.

The office is evolving into a more
Sustainable environment.

As individuals, we are now more aware of the impact we
have on our planet.

We want to be green, but don't want to compromise on the
quality of products we consume.

Echo has been designed to fulfil these needs.

Designed with **Sustainability** in mind

BIO-PUR Sustainable Foam

- Echo offers an eco-friendly seat foam that reduces the carbon footprint of the chair by 75%.
- The foam used is compliant with industry requirements Crib 5 fire rating, Persistent Organic Pollutants (POPS) and Per- and Polyfluorinated Substances (PFAS).
- By fulfilling these standards and requirements Echo has the ability to offer a superior environmentally profiled make-up without any change necessary to the product.

designed for re-manufacture

As we all look to move toward a more circular economy, echo's smart manufacturing technology allows for the chair to be re-manufactured to prolong its lifespan.

Utilising an easily retractable clip on seat pad with zero adhesives, we are able to reuse seat components for second lives.

We can easily separate backrest, mechanism, armrest and base components for replacement or recycling in a much more sustainable way than on a standard task chair.

100% Recyclable

Built using only 8 component parts, all of echo's components can be broken down and recycled responsibly.

echo's life-cycle is further enhanced by a 10 year guarantee. 100% recyclable.

Axent

Sleek.
Stylish.
Reactive.

To complete our deluxe task range, Axent was designed to compete in the high volume mesh market.

Axent comes as standard with seat depth adjustment, allowing specification to a wider audience than a standard task chair.

Enhanced aesthetics are achieved with a sleek curved backrest, which integrates seamlessly into the seat and mechanism of the chair.

Now available with a fully upholstered high backrest with ratchet height adjustment and inflatable lumbar support, the Axent family is complete.

Dani

Simple
One Piece Design
Slim Profile

When simplicity in an environment is the key, Dani ticks the box every time. Suitable for a wide application of workplace areas from dynamic meeting and collaboration zones to private working spaces, the simple and modern aesthetic makes Dani an obvious choice.

A simple height adjustable seat with a gentle lockable recline allows matching to the body's natural movements seamless, enhancing the comfort and user support.

Whether you want to combine a bespoke 2-tone upholstery finish for the ultimate aesthetic, or opt for the more traditional single tone look, Dani allows for a more creative environment.

Almond

Classical yet contemporary.

A multi-purpose alternative, Almond is ideally suited to bistro, breakout, dining or café areas.

With a selection of black frame options in chair and stool heights, the veneer shells in contrasting shades add that bit of class to most environments.

Lead Time

Subject to stock availability, Almond is available on a **4 week** lead time from confirmation of order.

Storage

Almond 4 Leg chair models can be safely stacked up to 4 units high (free-standing).

Weight

Avoca is recommended for users up to **100kg**.

in-house Product Development Team.

Relax

Soft lines, generous curves

Designed to allow you to do exactly as it says on the tin. Relax is a contemporary family offering a fresh blend of soft lines and clean aesthetics to suit any workplace, hospitality, or meeting environment.

The body of Relax is constructed using an injection moulded polyurethane foam around a lightweight steel surround frame. The result? A strong, supportive, and comfortable chair designed to last.

The Relax family is comprised of three sized models - Meeting, Lounge Mid Back and Lounge High Back. Suiting bases to all sizes means that keeping continuity of style across multiple areas or locations is a possibility made easy.

Choose your colour pallet and opt for single tone fabrics for a uniform look or with multiple two-tone upholstery options, you can customise each chair with differing colours and textures for the ultimate dynamic finish.

Soft & Collaborative

WORK, MEET AND COMMUNICATE IN COMFORT AND STYLE.

From reception areas to breakout and collaborative working environments, we have the solution to help create your perfect design.

Luca - 176

in-SIT Lo & Hi - 188

bTogether - 192

Pause & Pitch - 200

Designed for the **modern office**,
a range of furniture to help you
collaborate and **unwind**.

Luca

Stylish & Versatile

Luca is a distinctive modular sofa and booth system, designed to suite together and compliment any corporate, education or hospitality setting.

A family of 1, 2 and 3 seat sofa units alongside 2, 4 or 6 person booths all available in either low or high back variations. With it possible to specify internal arms, loose cushions and a multitude of power and data units, Luca is fully customisable to the individual environment each time.

Showcasing a simple and clean aesthetic with an equally high focus on seated comfort by incorporating deep cushioned seat pads with a supportive backrest, Luca is the ideal choice for your breakout solutions.

The simple design of Luca lends itself perfectly for either single, two or three tone upholstery to further complement the aesthetic of the environment.

The modularity of Luca allows for easy delivery and installation onsite by our experienced team, we can also provide simple and easy to follow installation training for your own installation teams.

bTogether

Be Comfortable.

Be Social.

Be Together.

We've developed a competitively priced modular booth system that is strong, durable and aesthetically pleasing.

Listening closely to the need of our clients, our in-house Design Team have refined our very popular bTogether concept to now include, bTogether Low and bTogether High.

These have been added to the range to make this product the ideal solution for every client in any environment.

Quality Guaranteed

Hand made, assembled and upholstered in-house. Solid wooden frame constructed from locally sourced materials. Available in high quality fabric, leather and vinyl.

Expertly finished with superior stitching detail. Enhancements available including electrical inputs, tables and TV brackets.

Comprehensive modular design allows for easy expansion. Easy to configure and simple to install.

Quick Reference Fabric Guide

Your options are endless when it comes to choosing a material to upholster your seating in.

We've tried to make things a little easier for you by compiling a list of the most popular selections in our fabric guide, letting you know which standards they conform to and whether the fabric your planning to use is suitable for the type of product you require.
